

INDUSTRIAL SERVICES

FROM INITIAL CONCEPT THROUGH TO COMPLETION.

At DMC we specialise in the architectural design of many types of functional buildings covering a wide range of activities from food processing, industrial manufacturing & processing, logistics, and warehousing.

Our experienced team can harness multi-disciplinary expertise to help you develop new facilities or optimise existing ones.

Every project we work on goes hand in hand with ACENZ and Engineering NZ specifications and guidelines to ensure that all business performance and the quality of service we provide adheres to the industries best practices.

Our proven methodology brings the benefits of upfront design work, which translates into improved value for your investment, minimised risk and reduced overall costs.
